ABOUT US

Healthware Australia has been servicing Dentists across Australia since 2015. We pride ourselves in dealing with our customers with the utmost respect, honesty and integrity accompanied with our 3 main customer focused Pillars:

OUR CORE VALUES

QUALITY - We source the highest quality products that have been trialed and tested by Dentists in the USA, Europe & Australia.

SERVICE - We strive to stand out through our professional and prompt service.

RELIABILITY - You can consistently rely on our service and quality everytime.

HOW TO ORDER

For all orders, please kindly place them through any of the 3 convenient options below:

WEBSITE: www.healthwareaustralia.com.au

EMAIL: info@healthwareaustralia.com.au

PHONE: 1300 542 546

NOTE: YOU WILL BE REQUIRED TO CREATE A NEW PASSWORD WHEN YOU LOG IN FOR THE FIRST TIME.

Dental PRODUCT SHOPPER
BEST PRODUCT

ProLink™ is a single step bonding agent that delivers outstanding shear bonding values to dentin, enamel and all popular light, dual or auto-cure composites.

Silmet ProLink Single Step Adhesive

5ml

CODE: **SL150005**

ProLink utilises advanced Colloidal Glass Technology to provide a first class dental adhesive. Intended use for Direct Composite or Compomer restorations, Adhesive cementation and Composite repair.

- Primer & sealer combined in 1 bottle
- Minimal treatment time
- Perfect marginal integrity
- Reduced polymerization shrinkage
- Increased adhesion & durability
- Ultimate protection for dentin regeneration or pulp capping ability

ProFil™ Bulk is a dual cure dental restorative composite designed for direct restorations.

Silmet ProFil Bulk Dual Cure Automix Syringe

5ml

CODE: **SL185A02 A2**
SL185A03 A3

It is suitable for bulk fill technique in the posterior region and can be applied in an unlimited layer thickness.

- Unlimited depth of cure
- Dual curing mechanism
- Compatible with all methacrylate-based dental bonding agents
- Superior compressive strength
- Utilization of intercalated and exfoliated technology
- Easy-to-use and apply using an industry standard, auto-mix dispensing system. Saves time and provides a consistent, homogeneous mix

Silmet ProLink CEM Primer
5ml CODE: **SL150501-P**

Self-adhesive Universal Resin Cement. Can be used on crowns, veneers, inlays/onlays, bridges, crowns/abutments on implants, and posts.

Like other similar self-adhesive cements, pre-treatment of the tooth, such as etching, priming and bonding, is eliminated, reducing steps and saving chair time.

- The perfect choice when there is adequate retention. Offers one of the most secure holds with no need for additional bond, prime or etching steps.
- No pre-treatment of tooth or application of primer as for metal & zirconia.
- Low film thickness (< 0.3 mm) ensures excellent fit of the prosthesis.
- Excellent color stability for long lasting aesthetic results.
- Predictable handling, optimized flow of the paste allows for exceptional ease of use and easy removal of excess material.
- Used in self-cure, light-cure, or dual-cure modes.
- Superior self-etch adhesive technology.
- Radiopaque and allows for useful diagnostic and excellent identification under x-ray.
- Two functional monomers for perfect results.
- No need for refrigeration.

Silmet ProLink Universal Adhesive 8th Gen
5ml CODE: **SL1505UN**

Universal Dental Adhesive ProLink Universal is an 8th-generation light-cure universal dental adhesive that combines etching, priming and bonding in one bottle.

ProLink Universal is an Ethanol/water-based adhesive engineered for use for both direct and indirect restoratives, flexible for use with all etching techniques, and is compatible with self or dual-cure composite and resin-based cement without an additional activator.

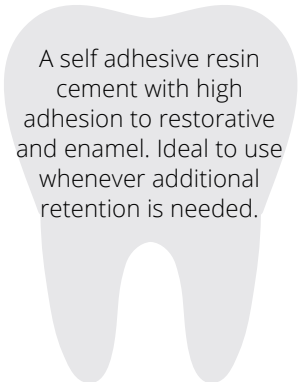

- All in One / Single bottle – Minimal technique sensitivity.
- Total Universality – Suitable for direct and indirect restoratives in all cure modes and any etching techniques
- Contains MDP and 4-MET – Forms a better double chemical adhesion
- Moisture and Humidity Tolerant – Improves the bond performance under variable humidity conditions and deep dentin
- Low film thickness
- Low Acidity

LEDERMIX™

A Long History as the Leading Clinically Proven Solution.

**LEDERMIX™
CEMENT & HARDENER
BACK IN STOCK!**

DON'T LET THEIR PAIN BECOME YOUR PAIN.

LEDERMIX™ Cement And Hardener

Both zinc oxide and eugenol have well known and therapeutic effects on the pulp. Eugenol can be both anti-inflammatory and anti-microbial, depending on the concentration reaching the dentine and pulp.

Triamcinolone, released from LEDERMIX™ Cement can diffuse through the dentine to reach the pulp. In one study, 97.6% of teeth, treated with LEDERMIX™ Cement, had the reversible pulpitis resolved.¹

In addition, calcium hydroxide has beneficial effects on the healing of dental pulps and the formation of reparative dentine.

LEDERMIX™ Cement, being a hard setting material, is useful as a sedative dressing or lining under temporary or final restorations in teeth with reversible pulpitis – with or without pulp exposures. Interim crowns can be cemented using LEDERMIX™ Cement to reduce inflammation due to preparation. Additionally, LEDERMIX™ Cement can be used in the management of cracked teeth with reversible pulpitis.

For primary teeth, LEDERMIX™ Cement can be used as a root filling material following canal cleaning and preparation.

LEDERMIX™ Paste

The application of preparation which has been used and well known for over 40 years, LEDERMIX™ Paste is what is called for.

Due to the active substance, triamcinolone, LEDERMIX™ Paste counteracts pain symptoms promptly and quickly and leads to a significant improvement. The wide-spectrum antibiotic demeclocycline that is contained as further active substance reduces the usually attendant bacterial contamination. This particular combination of active substances allow LEDERMIX™ Paste to be effective in more ways than one: Quick relief from pain and effective reduction of cariogenic contamination and the simple application makes this preparation a very effective one for all the particularly unpleasant situations in which otherwise only less effective therapy measures are at the disposal to relieve the patient suffering from pain. The combination of triamcinolone and demeclocycline allows LEDERMIX™ Paste to give fast relief from pain² and effectively reduces microbial contamination.³

- Deep carious lesions, and symptoms of acute irreversible pulpitis.
- Infected pulp, necrosis of the pulp.
- Medicinal temporary filling in the scope of root canal treatment.
- Pain after preparation measures.

Clinically Proven Root Canal Treatments

CALMIX[®]

Root Canal and Vital Pulp Therapy.

Therapeutic Benefits

- Bioavailable – greater hydroxyl ion release
- pH above 14 and maintains higher pH than any other Calcium Hydroxide medicament to overcome the buffering effect of dentinal fluids. Therefore, Calmix[®] has a greater antimicrobial disinfection effect, including fungi.
- Zirconium dioxide provides improved, non-staining radiopacity which lights up on cone beam applications.
- High alkalinity provides alkaline etching.
- Haemostatic effect on bleeding tissues – has a coagulation effect.
- Can be used for pulp capping – promotes dentine bridge after 14 days.
- Apexification effect in open apex cases.

	Code	
1.5ml Syringe + 5 Tips	OZ006201	44.00
4 X 1.5ml Syringes & Tips	OZ006200	\$122.90

Handling Properties

- Water free – therefore will not dry out in the tube and has a longer shelf life.
- No methyl cellulose so narrow-gauge tips can be used to flow material to curved canals and lateral fins which are fine and narrow.
- Water miscible - therefore Calmix[®] is easier to irrigate from canals.

IPR Strip System Product Information

The ContacEZ **IPR Strip System** is a safe and innovative interproximal reduction system that makes interproximal enamel stripping efficient and accurate without creating sharp corners or subgingival ledges. Designed for use with clear aligners and other orthodontic treatments, these flexible diamond strips conform to the natural contours of the teeth to maximize patient comfort and safety.

- ▶ Ergonomic, single-handed design
- ▶ Provides optimal tactile control
- ▶ Will not remove excess enamel
- ▶ Will not cut lips or gums
- ▶ Prevents sharp corners or subgingival ledges
- ▶ Effective for anterior and posterior areas
- ▶ Central opening for maximum visual perception
- ▶ Saves chair-time

Usage Guidelines & Technique

This technique is especially effective for anterior teeth and for case refinement. ContacEZ *IPR Strips* are autoclavable (**steam heat only, no dry heat, up to 270°F for 10 minutes at 30 psi max**) and reusable, and should be sterilized prior to the first use. The manufacturer recommends to use each strip up to 5 times for maximum efficiency and functionality.

- ① Hold the strip with your thumb and forefinger, insert it into the interproximal space, and gently pass back and forth buccolingually until the strip is passive. Do not use vertical force. Start with the thinnest diamond strip, and repeat with thicker strips until you have reduced (stripped) the correct amount of enamel according to the treatment plan.
- ② To ensure accurate measurements, polish the proximal surface using the ContacEZ **Gray Final Polishing Strip**.
- ③ Verify reduction achieved using the ContacEZ **Incremental Thickness Gauge**.
- ④ **Pediatric dentists** can use ContacEZ *IPR Strips* for the serial proximal reduction of primary molars.

Clinicare Alcohol Free Instrument Grade Low Level Disinfectant Wipes

Flatpack 200/pk	\$17.95
Refill 180/pk	\$14.70
Canister 180/pk	\$17.00

Class IIb registered disinfectant

Formulated and tested for use in Healthcare environments

Increased surface coverage with a specially designed towelette

Broad Spectrum multi-purpose decontaminant and disinfectant wipe

Clinicare Alcohol Free Instrument Grade - Low Level Disinfectant Wipes effectively clean and disinfect surfaces, reducing the risk of cross contamination thanks to its broad-spectrum activity across a range of organisms. The unique formula means you no longer need to stock various products for each step of the disinfection process. Clinicare wipes excel at the removal of soiling when decontaminating surfaces, thanks to the uniquely flat surface cloth pattern, pre-saturated with Clinicare Alcohol Free Instrument Grade - Low Level Disinfectant formula. The wipes ensure a uniform application, better fluid capacity and improved surface coverage.

Miratray Implant 6/Pack

A patented foil-lined impression tray designed specifically for taking accurate implantology impressions

Holds impression material accurately while allowing the implant pins to penetrate the foil layer

Creates highly precise results in seconds without the need for a custom tray

Simple, clean and easy to use

Available in small, medium and large sizes for both the upper and lower jaws.

CODE	
HW101250	Assorted
HW101254	Small Lower

Hager Werken Reso-pac

A breakthrough in wound protection! Reso- Pac is the first wound protection paste which:

Adheres to damp and bleeding wounds to achieve haemostasis and protection against infection

Is soft, easy to apply, stays securely in place and is comfortable for your patients.

CODE		
HW155011	25g Tube	\$61.90
HW155014	50x 2g Cups	\$199.00

Hager Werken GapSeal

Sealing gel placed into the implant space before screwing in:

Effectively seals gaps and hollow spaces around implants
Remains in-situ for the life of the implant to prevent bacterial colonisation

Quick and easy application system using pre-filled sterile tips

Eliminates a key reason for implant failure and is supported by over 10 years.

The Premium-Evolution series

The new benchmark for steam sterilizers

- Patented double-jacket technology brings the fastest of operating times
- With patented DRYtelligence - intelligent drying for every load configuration
- Documentation, approval and traceability via XXL colour-touch display with intuitive operating interface

Besides the typical MELAG features such as record operating times, intuitive operating concept, integrated documentation and approval, the steam sterilizers of the new Evolution series offer a range of unique innovations, which can only be developed in this perfection by a specialist for practice hygiene and instrument decontamination. The focus of the new Evolution series is the combination of even shorter operating times and thus faster instrument availability and energy savings.

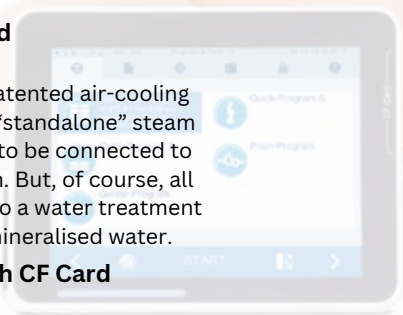

Vacuklav 40 B+ Evolution and Vacuklav 44 B+ Evolution:

These steam sterilizers have a fixed water connection and, through the innovative water cooling of the vacuum pump, they represent the ultimate benchmark not only in terms of operating times and handling, but also for quality and reliability.

Vacuklav 41 B+ Evolution and Vacuklav 43 B+ Evolution:

These steam sterilizers have a patented air-cooling system, which makes them real “standalone” steam sterilizers, since they only need to be connected to an electrical outlet for operation. But, of course, all four devices can be connected to a water treatment unit for the direct supply of demineralised water.

- All units are supplied with CF Card
- Includes 6 Trays

- Saving Time - With a maximum load of up to 40 kg, the Cliniclave 45 can sterilize significantly more instruments than other devices of its class. Sterilize your instruments in less than 45 minutes, including drying.
- Safe Documentation - The extra-large colour-touch display enables intuitive operation. Its integrated documentation and clearance software permits complete reproducibility
- Ergonomic Working - A range of batch configurations can be inserted in and removed from the Cliniclave 45 quickly and ergonomically.
- Saving Energy - The large load sizes and its low water and energy consumption make the Cliniclave 45 one of the most efficient and compact large steam sterilizers of its class
- Add in Description, Also available in 203 litre capacity with double door configuration. These are speciality products and initial consultation with a Melag specialist is required.

Load up to 40KG

X-Large colour-touch display

Low water & energy consumption

The MELAtherm 10 is a washer disinfector complying with the EN 15883 European Standard. It is ideally used in processing instruments by machine.

NEW

ZOLL AED PLUS SEMI AUTOMATIC DEFIBRILLATOR

CODE: ZOL102011050

\$2,195.00
INC GST.

- ✓ CPR Help provides integrated, real-time feedback on CPR compression rate and depth
- ✓ Designed to be durable, the AED Plus can be used in various environments
- ✓ 5 year battery and pad life
- ✓ 7 year warranty

The ZOLL AED Plus was the first AED with Real CPR Help to help rescuers know when they are performing high-quality CPR. Today, the ZOLL AED Plus continues to set the benchmark for design, dependability, durability, and performance.

CUSTOMER REVIEWS

““

Healthware Australia have exceptional customer service skills, always deliver on time and accomodate last minute requests with ease. Thank you Rimon, you and your team are amazing!!!

- *Simone B*

““

6th star, needed here Google! These people are serious and trustworthy. Highly recommend!!!

- *Dr Abbari*

““

Absolutely amazing customer service. Michael and his team have made our life so much easier. Highly recommend them

- *Jessie M*

““

One stop Dental Suppliers in Sydney. Michael and Rimon always personally looking after you, listening to your requests with professionalism and commitment. Best prices and smooth, immediate delivery next day. With 30 years in dental ordering, this is the best customer service ever till now. Try and see for yourself.
