Pin and Ligature Cutters

- Wear and corrosion resistant steel jaws
- Steel jaws ensure consistent performance and reliability of cutting edges.
- Plier's shape with round edges allows maximum comfort and safety
- Forging is made with highest quality surgical grade stainless steel.
- Made with box-joint method, which stops lateral play or staggering.
- Retains cutting edges alignment and provides smooth and precise floating movements without effort.
- Exactly specified sizes and design of handles, ensures comfortable fit with the natural movement of hands.
- Stainless steel Matte finish with Mirror touch on the handle
- Narrow and slim jaws designed for easy access for hard to reach areas. Cuts soft wires, pins and elastics.

PR-1002
Micro Pin and Ligature Cutter
Straight
Soft wires up to 0.015"

PR-1006
Pin and Ligature Cutter
Straight
Soft wires up to 0.015"

PR-1004
Micro Pin and Ligature Cutter
15 Degree Angled
Soft wires up to 0.015"

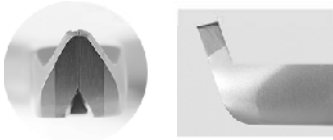

PR-1008
Micro Pin and Ligature Cutter
15 Degree Angled
Soft wires up to 0.015"

PR-1018
Hard Wire Cutter Straight
Archwire up To .022" X .028"

PR-1020
Hard Wire Cutter 15 Degree Angled
Archwire up To .022" X .028"

PR-1022

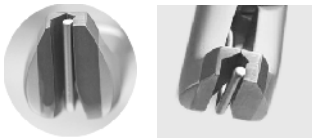

Distal End Cutter Mini Handle
With Safety Hold
Maximum Cutting Capacity: .021" X .025"

PR-1026

Instrument Sterilisation:

Inspect, clean, and sterilise before each use.
Autoclave for at least 3 minutes at 134°C.

- Sterilisation is recommended before each use.
- Instruments must be cleaned and sterilised in the open position.
- Clean instruments thoroughly, rinse and dry before Sterilisation.
- Remove instruments immediately when cycle is complete to avoid corrosion or discoloration.
- Brown or yellow discoloration of instruments may occur if instruments are not dried after sterilisation, not well cleaned or not kept in a dry place.
- Discolouration may appear that may not be corrosion and can be removed by scrubbing with light wool saturate.
- Never Mix a corroded instrument with new instruments as oxidation may spread to new instruments.
- To help prevent corrosion, please use an alkaline ultrasonic detergent such as NCA 360.
